

# MONTHLY & DAILY CRSP US TREASURY RELEASE NOTES

DECEMBER 2014 ANNUAL UPDATE

## FINAL LEGACY TREASURIES FILES NOTICE

This December 2014 cut of the data will be the last that will include the Legacy files and the sample programs that accompany them.

In December of 2010, CRSP introduced a new set of Treasuries files that included many enhancements and improvements over the original daily and monthly files. With the introduction of the new files, CRSP consolidated the original files into a Legacy folder, with the volume label TLZyyyymm and strongly encouraged subscribers to transition to the newly organized flat files or the CRSPAccess database version to be used with CRSPSift.

## ATTENTION CRSPSIFT USERS!

On August 7, 2014, Sift version 4.2 expired.

New versions of Sift Professional and Enterprise are now available to all CRSP subscribers for downloading on our MOVEit site, <https://crsp.moveitcloud.com> in the Utility\_Downloads folder.

Sift Professional is supported on Windows 7 and Windows 8 computers. Sift Enterprise supports Servers 2008 R2 and 2012 R2. See details in the Sift Release Notes on our website at <http://www.crsp.com/products/software-access-tools/crpsift>

## GENERAL DATABASE INFORMATION

- SAS data sets are provided, which can be used with SAS directly with no conversion needed.
- The CRSP US Treasury Databases have been tested on Windows 7, Sun Solaris and Linux.

The following platforms with the listed compilers are currently supported:

	<b>FORTRAN-95</b>	<b>C (DAILY ONLY)</b>
Windows:	Intel FORTRAN Compiler 9.1	MS Visual Studio C++
Linux:	g95 v 3.5.0 (Free) Lahey/Fujitsu FORTRAN-95 v 6.20	gcc 3.2.3

## ZIP INSTALLS

CRSP uses a zip process for data installation. ZIP utilities that are standard on all platforms should work to unzip the databases. On Windows computers, CRSP recommends using 7-ZIP, which can be downloaded from this site: <http://www.7-zip.org/>

See the following page for further information.

### ZIP FILE STRUCTURE AND PROCESS

There are five separate zip files; each will have to be extracted separately. At the time the files are unzipped, make sure to set the directory path to the intended home directory (for example, in Windows C:\ , in Red Hat or Solaris /home). The unzip process will extract to that directory under the subdirectory \crspdata.

Note that the destination directories have also changed as part of this process:

ZIP FILE ON DISK	DESCRIPTION	INSTALL PATH	SUB-DIRECTORIES
trzyyyymm_legacy	Legacy flat files	\crspdata\trzyyyymm_legacy	bdzyyyymm and bmzyyyymm
trzyyyymm_ascii	CRSP ASCII flat files	\crspdata\trzyyyymm_ascii	
trzyyyymm_cadb	CRSP Access files	\crspdata\trzyyyymm_cadb	
trzyyyymm_excel	CRSP Excel files	\crspdata\trzyyyymm_excel	
trzyyyymm_sas	CRSP SAS files	\crspdata\trzyyyymm_sas
