CRSP US INDEX HISTORY FILES - INTRADAY

The CRSP US Index History Files - Intraday include second-by-second levels of CRSP's investible Equity Indexes and End of Day levels. The six files that comprise the data set are provided in SAS and ASCII formats and listed below:

File Name (* .sas7bdat or *.dat)	SAS Size	ASCII Size	Start Date	Description
Cap	4.47 GB	7.99 GB	4/1/2011	CRSP Market Cap Index levels – second by second
Vg	4.20 GB	7.46 GB	9/10/2012	CRSP Value Growth Index levels – second by second
Sector	4.59 GB	8.09 GB	9/21/2012	CRSP Sector Index levels – second by second
Eod_cap	<1 MB	<1 MB	3/31/2011	CRSP Market Cap Index levels – end of day
Eod_vg	<1 MB	<1 MB	9/7/2012	CRSP Value Growth Index levels – end of day
Eod_sector	<1 MB	<1 MB	9/20/2012	CRSP Sector Index levels – end of day
Total Zip File Size	8.32 GB	6.20 GB	N/A	Zippered File
Total File Size	13.27 GB	23.56 GB	N/A	Unzipped File

**Price level indexes start dates. Total Return level indexes start at various other dates listed in Index List details at the end of this document.*

UPDATE APRIL 2014: Six new indexes have been added to the files. Included in the Small/Mid Capitalization suite are Total Return and Price-only indexes, and Value and Growth Total Return and Price-only indexes. New indexes are included in columns to the far right of each file.

FILE LAYOUTS

Second-by-Second file layouts for index families differ only by the number of indexes in the family. ASCII files are pipe delimited.

- The first column of all files is the Date field in mm/dd/yyyy format.
- The second column of all files is Time field in h:mm:ss format.
- Remaining columns are index levels, each identified by Index Ticker. Levels in the ASCII files are printed at 13.6. The six decimal places represent the full precision that is provided to CRSP.

End-of-Day file layouts for index families differ only by the number of indexes in the family. ASCII files are pipe delimited.

- The first column of all files is the Date field in mm/dd/yyyy format.
- Remaining columns are indexes, each identified by Ticker.

FILE NOTES

- There are two sets of each category of indexes, Total Return, and Price Only.
- *For future reference: In the CRSP historic products, our internal identifier, INDNO includes both total return and price only data. Tickers, CUSIPS, and other identifiers for CRSP products will serve as descriptor fields and not as access keys.*

- Consistently for all indexes and for the full series, the End-of-Day value and the following day 9:30am (ET) values do not match. This is due to the application of cash dividends.
- For capitalization price-only indexes, prior to August 2, 2012, roughly 15% of the End-of-Day values do not match the 9:30 ET open values. These differences are related to the handling of late corporate actions. Data processing was improved, eliminating the mismatches after the August 2nd date.
- CRSP RESTATED INDEXES FOR SEPTEMBER 30 AND OCTOBER 1: CRSP restated end-of-day index levels for September 30 and October 1 due to a closing price error for Leidos Holdings, ticker: LDOS (from \$43.977143 to \$45.52), resulting in minor changes to the Price and Total Return index levels for the following six indexes: Total Market, Mid-Cap, Large-Cap, Technology, Mid-Cap-Value and Large-Cap-Value Indexes.
- An additional day is tacked onto the beginning of the files to allow for an end-of-day return on the first trading day.

START DATE AND INDEX = 1000 DATES

The second-by-second levels data availability of the indexes vary depending on when they were released to the public and consumed by IDC's basket calculator.

TOTAL MARKET AND CAPITALIZATION INDEXES

- Price-only index levels begin April 1, 2011 and are indexed to 1000 on the start of that date.
- Total return index levels, while indexed to 1000 on the start of April 1, 2011, begin in the data files on December 7, 2012.
- **Exception:** Small Cap X REIT price-only index has a start date of September 10, 2012. The price-only and total return indexes are both indexed to 1000 on the start of that same date.

VALUE/ GROWTH INDEXES

- Price-only index levels begin September 10, 2012 and are indexed to 1000 on the start of that date.
- Total return index levels, while indexed to 1000 on the start of September 10, 2012, begin in the data files on December 7, 2012.

SECTOR INDEXES

- Sector indexes were based at 1000 on a date in the series that is earlier than the date that we are starting the indexes in these files. The September 21 start date is used because it is as of this date that the current constraint methodology was finalized.
- Price-only index levels begin September 21, 2012 and are indexed to 1000 on the start of February 2, 2012.
- Total return index levels, while indexed to 1000 on the start of February 2, 2012, begin in the data files on December 7, 2012.
- **Exception:** CRSP REIT price and total return indexes are indexed to 1000 on the start of April 1, 2011. This is because they were released with the Total Market and Capitalization Indexes.

FREEZES

Short freezes in the second-by-second files prior to June 2012 occur, on average, a few times a day. After that time, they occur only once or twice a month. Even rarer – less than 20 in the entire history – are periods in excess of 60 seconds where the basket calculator froze or data were unavailable. These exceptional cases are sorted by date and are listed in the table below.

STATIC VALUES \geq 1 MINUTE

BEGIN DATE	BEGIN TIME	END DATE	END TIME	COUNT	INDEXES IMPACTED		
					CAPITALIZATION	SECTOR	VALUE/ GROWTH

8/15/2013	14:30:30	8/15/2013	14:31:36	67	x	x	x

LARGE RETURNS (ABSOLUTE VALUE)

On two occasions, invalid constituent level ticks came through the feed and impacted index returns. These anomalies are beyond CRSP's control and, fortunately, are infrequent and self-correcting. One was for less than one minute, the second for nearly two minutes. The impact of each is displayed in the table below.

DATE	TIME	RETURN	PRICE RETURN TICKER	TOTAL RETURN TICKER	INDEX NAME
3/1/2013	9:30:20 AM	103.51%	CRSPID1	CRSPIDT	CRSP US Industrials
